## WORK EXPERIENCE

---

**KAYAK** Cambridge, MA

*August 2016 – Present*

*Senior Software Engineer (January 2019 – Present)*

*Software Engineer (August 2016 – Present)*

- Served as one of the principle engineers for the car, flight, and hotel booking pages
- Architected and developed a modular, component-based codebase which operates across multiple brands and locales
- Created hotel and flight checkout paths where users save money by purchasing two separate reservations on a single booking page
- Integrated third-party APIs and SDKs to generate new content
- Performed phone and onsite interviews for general and front-end software engineering candidates
- Managed and mentored three interns
- Able to seamlessly develop within a complex codebase that spans multiple services
- Actively work as a senior engineer for many of the site's hotel-related pages

**Tufts University** Medford, MA

*December 2015 – May 2016*

*Computational Theory Teaching Assistant*

- Graded papers, collaborated with students, and provided feedback on assignments

**KAYAK** Cambridge, MA
